FINANCIAL AND COMMERCIAL.

WEDNESDAY, Dec. 18-6 P. M. Mr. Chase arrived in town this morning, and th banks have been in session all day and in conference with him. It is always a matter of extreme difficulty to ascertain the proceedings of bank meetings, the bankers seeming to consider the press their natural enemy, except when they wish to use the newspapers. We believe, however, that a resolution was passed agreeing to take hal he amount due the banks by the Secretary for re mbursements in Treasury notes, and that some other matters of detail were debated. The general subject of the future policy of the banks with th government was laid over till te-morrow, when the banks meet again at ten A. M.

We have reason to believe that Mr. Chase's pla of finance has not been thoroughly apprehended by the people or by the banks. It has been generally supposed that it involved the withdrawa from circulation of the paper currency now affeat This, as we understand it, is not intended. Mr Chase simply proposes to add to the present volume of paper currency as much more as the war may the new paper to be issued by the banks of the deposit of United States sixes. Such an issue would rest upon the double security of the banks themselves and the credit of the United States government, and would thus possess a solidity reater than could be obtained by any other method It is true that such an issue of paper-to the amounts required for the prosecution of the warwould cause an inflation of a very formidable char acter. But an inflation, from causes which we have mentioned more than once, is inevitable under any system of finance; the money required for the cannot be borrowed by the usual methods fast enough for the requirements of the Treasury. The only point which it is possible to secure, in view of a reaction, is to see that the new currency which must be issued for the purposes of the war shall be as sound as possible; and this maximum of security Mr. Chase considers will be attained by combining the security of the banks themselves with that of the general government. It will at once occur to the reader that the difficulty in this system will prove to be the redemp-tion of the notes. If the associated tanks, for instance, should by some process obtain a hundred millions of dollars, purchase United States six per cents with them, and issue \$100,000,000 of bank notes thereupon, how could these notes be reed in coin under a system of specie payments? In the event of a refusal by the banks to co-operate in the adoption of this system, we have reason to believe that Mr. Chase will rely, for the present, upon his demand notes. Of these he has \$30,000,000 still on hand; and, in case of necessity, Congress will undoubtedly authorize a further issue. These will continue, as heretofore, to be redeemable in coin on presentation at the Sub-Treasuries so long as there is any coin left to redeem them.

The resolutions passed at the bank meeting yesterday, though excellent in spirit and generally judicious, failed to improve matters to-day. Pub lie confidence seemed even weaker than yesterday; foreign exchange rose 1/2 per cent, and large unts could not be obtained even at the advance. The money market, which has been gradually growing easier for some months, took a sudtern the other way, and call loans could not be obtained at seven per cent. It seems that the banks have called in all their loans, and refuse a loan on call until the present imbroglio is brought to a close. The news from England had, of course, something to do with the increased distrust. But it is due to truth to say that many of the bankers hemselves make no secret of their dissatisfaction at the passage of the resolutions printed in this rning's HERALD, and recall, with mortification, the passage of very similar resolutions just before

the suspension in 1857.

Stocks fell off heavily this morning, partly on the foreign news, and partly on the bank resolutions, which were regarded as foreshadowing a sible conflict between the banks and the foreign cankers on the one hand, and between the government and the banks on the other. At one time a perfect stampede prevailed. New York Central fall 1½; Erie, 2½; preferred, 3; Michigan Central, 4; Pacific Mail, 2½; Read'1g, 2; guaranteed, 1; Panama, 31/4; Illinois Central, 2; Toledo, 21/4; Rock Island, 2; Quincy, 21/4. Governments were lower, without large transactions. State stocks were pretty steady. After the board it transpired that Mr. Chase had expressed the opinion that the trouble with Great Britain was susceptible : a pacific solution, and that his negotiations with the banks were progressing satisfactorily. On the strength the market improved, and rallied 3/ a 1 per cent at the afternoon board, Stocks closed steady, the following being the last quotations :- United States 6's, registered 1881, 87 a 88; do, 6's, coupon, 1881, 90 a 901/4; do, 5's, 1874, 79 a 80; Indiana 5's, 77 a 79; Virginia 6's, 46 a 46; Tennessee 6's, 40 a 40%; North Carolina 6's, 86 a 58; Missouri 6's, 35% a 36; Pacific Mail Steam-ahip Company, 78% a 79; New York Central Rail-road, 75% a 75%; Eric Railway, 23% a 23%; dopreferred, 431/2 a 44; Hudson River Railroad, 331/4 a 34; Harlem Railroad, 101/4 a 101/4; do. preferred, 25 a 251/4; Reading Railroad, 31 a 311/4; Michigan Central Railroad, 41 a 411/6; Michigan Southern and Northern Indiana Railroad, 161/2 a 163/4; do. guar anteed, 361/2 a 37; Panama Railroad, 1051/2 a 106%; Illinois Central Railroad, 56% a 56%; Galena and Chicago Railroad, ex div., 62 a 621/4; Cleveland and Toledo Railroad, 28 a 281/4; Chicago and Rock Island Railroad, 441/2 a 441/2; Chicago, Burlington and Quincy Railroad, 49% a 50%; Delaware, Lacka, wana and Western Railroad, 75: Milwaukee and Prairie du Chien Railroad, 17 a 1734; Illinois Central bonds, 7's, 85 a 86.

The business of the Sub-Treasury was as follows to-day:-

The government has called for another instalment of ten per cent, \$3,500,000, from the banks,

on the last loan (funded stock).

The exchanges at the Bank Clearing House this

morning were \$21,366,470 24, and the balances \$1.661.791 70. The directors of the Minnesota Mining Company

Lave declared a semi-annual dividend of three dollars per share, making eight dollars per share, or sixteen per cent from the net earnings of the year 1860, payable on the 6th of January. The transfer books will be closed on the 28th inst., and remain closed until after the payment of the dividend. The probable net earnings of the company for 1860 were estimated in their last report (part of the product being then unsold) at about \$210,000; but, in consequence of the fall in prices soon after. the actual profits realized fell a little short of \$200,000, out of which \$100,000 were paid out to the stockholders last July, and \$60,000 more de-clared in the above dividend. It appears, therefore, that the directors have prudently reserved a larger surplus than usual, to keep themselves strong in the present unsettled state of national and commercial affairs. The Mechanics' Bank has Acclared a semi-annual dividend of three and a half per cent, payable January 2; the Hamilton Fire Insurance Company, a dividend of four per cent, payable on the first Monday in January.
